"I bridge strategy and execution — designing institutional-grade digital systems that scale across African markets, combining technical depth, regulatory fluency, and human-centred design."

PROFILE

Director and Lead Systems Architect of the Visibility Ecosystem with 20+ years bridging fintech, telecoms, and institutional digital transformation across 10+ African countries. Builds licensable platforms — not one-off projects — combining full-stack engineering with policy-grade regulatory fluency (FSRA, FASSET, DHIS2) and human-centred design for low-resource contexts.
